

PRODUCT SAFETY ALERT

SL227 Static Line Traveller

Warning: - Failure to read instructions could result in serious injury or death!

1. It has come to our attention that the Traveller may become disconnected when misused. We request you adopt the following procedure, until replacements become available:-
 - 1.1- All SL227 Travellers should be returned to your supplier.
 - 1.2- We recommend that in the interim if the static line system must be used, that a double lanyard system be adopted. A standard karabiner can be used to connect to the Static Line. (note:- Double Lanyard system must be used when the user is closer than 2m from a fall edge. User must remain safe at all times)

NOTE: Care needs to be taken that the energy absorber is not 'short-circuited', i.e. by clipping one leg of the dual lanyard back to the harness.

2. We will forward the new Static Line Traveller back to you as soon as possible.

Any Enquiries to be directed to your supplier or email technical@sayfa.com.au
